REILLY BROS.

NURSERYMEN

DANSVILLE, ~ NEW YORK

Spring 1910

Order Early

Orders should be sent in just as early as possible to insure prompt attention, since it is our rule to fill them in the same order as received. We cannot delay orders first received for those coming in late in the season. Discount on cash orders received before March 1st.

Reference: Postmaster, J. B. Morey; Citizens Bank of Dansville; B. G. Foss, Attorney at Law.

Terms—Cash with order, except in large orders when satisfactory reference is given, and then the order must be accompanied by one-fourth cash.

C. O. D. Orders—We will ship stock C. O. D., providing one-fourth cash accompanies orders.

Discount—On all cash orders received before March 1st *five per cent discount*. On all cash orders received after March 1st three per cent. *No discount allowed on any but cash orders.*

Remittance—Should be made by Bank Draft, Express Money Order, Post Office Order or Registered Letter.

In Ordering—Use the enclosed order blank and give full shipping directions. If post office address is different from railroad station be sure to give both.

San Jose Scale

There has never been any San Jose Scale found within 50 miles of Dansville. We had three state inspectors in our town looking for dangerous insects and diseases, the result was that they not only found Dansville trees free from all diseases but proclaimed them the *healthiest, hardiest and best matured trees they had seen*. Read clipping below taken from the Dansville Advertiser.

Dansville Nurseries Free From San Jose Scale

New York Inspector Barden unreservedly declares that Dansville is the only nursery center of any important size that is entirely free from San Jose Scale; this fact is not generally known. Mr. Barden believes that Dansville trees are worth five cents each more than the market price, as the reputation of Dansville Nurseries for freedom from San Jose Scale and general vigor of its trees and plants is worth many thousands of dollars to the planter who buys Dansville trees. —*Dansville Advertiser.*

No. 692

State of New York Department of Agriculture

Certificate of Inspection of Nursery Stock

This is to Certify that the stock in the Nursery of Reilly Bros., of Dansville, County of Livingston, State of New York, was duly examined in compliance with the provisions of Section 305, of the Agricultural Law, and it was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose Scale or other dangerously injurious insect pest or pests. This certificate expires September 1st, 1910.

Dated, Albany, N. Y., September 1st, 1909.

R. A. PEARSON,
Commissioner of Agriculture.

YORK IMPERIAL APPLE

Apples

The first fruit, both in importance and general culture, is the Apple. Its period, unlike that of other fruits, extends nearly or quite through the year. By planting judicious selection of Summer, Autumn and Winter sorts, a constant succession can be easily obtained of this indispensable fruit for family use.

Apples for Profit—The planting of commercial orchards is simply a business proposition. It can be made to pay better than almost any line of outdoor work, providing the grower does his work thoroughly, persistently and intelligently.

We have this year the finest block of Two-Year Apple we have ever grown. Trees have good, straight bodies, long, fibrous roots, and perfect-shaped heads. We have an extra good supply of that grand old Apple, Baldwin, considered by all the best commercial Apple grown, also York Imperial, Gano, Stark, Greening, Jonathan and N. Spy.

We have several blocks of fine one-year buds, which will run about five to seven feet high, considered by our largest commercial planters the best grade to plant. We can fill orders no matter how late sent, in our one-year grade. We strongly advise the planting of one-year trees for these reasons; they can be bought for less money, freight charges are less, can be dug with more perfect root, can be trained to any desired shape, and will become sooner established in their new locality.

Early Harvest—Medium to large, white fleshed, tender and subacid, ripens in July, but may be used for cooking earlier. Tree erect, moderate in growth, and quite productive.

Golden Sweet—A large, yellow Apple, very sweet and good. A strong grower and good bearer.

Red Astrachan—Large, roundish, deep crimson, with a thick bloom, juicy, tender, somewhat tart, valued as one of the most beautiful early market and dessert Apples, also for the best hardiness, and vigor of the tree. Aug.

Sweet Bough—Large, pale yellow; sweet, tender and juicy. Tree a compact grower and abundant bearer. August.

Yellow Transparent—A particularly desirable and beautiful sort that usually bears the first year after planting, often in the nursery rows. Fruits of medium size, round-ovate, pale waxen yellow when fully ripe, pleasantly acid, tender and good, ripening in July and August, before Early Harvest. Free-growing and fruitful.

Autumn Apples

Alexander—A very large and beautiful deep red or crimson apple, of medium quality. Tree very hardy, and a rather light bearer. September and October.

Bismark—Very large, remarkably handsome and showy; color red on yellow ground; flesh yellow; quality good; extremely hardy and prolific and bears very early. November.

Duchess of Oldenburg—This best known of the Russian Apples, is also the handsomest and most valuable, succeeding even in the Northwest, where most of the varieties fail, and yielding well in all sections. The fruit is large, rounded, striped with red and yellow; tender, juicy of the best quality for cooking and esteemed by many for the dessert. The tree bears young and abundantly. August and September.

Fall Pippin—Very large, roundish, oblong; yellow; flesh tender, rich and delicious. Tree spreading, and a fine bearer; valuable for table or market use. September.

Fameuse (Snow Apple)—Medium size; deep crimson; flesh snowy white, melting, and delicious. One of the finest dessert fruits, and valuable for market. A good baking apple. October to December.

Gravenstein—A very large, striped, roundish apple of the finest quality. Tree erect in growth, and very productive. One of the finest fall apples. September to October.

Pumpkin Sweet—A very large, round, yellowish russet apple, very sweet and rich. Tree a rapid, upright grower. October and November.

Wealthy—Medium size, roundish; skin smooth and of dark red color. Flesh white, fine, juicy, sub-acid, very good. Tree very hardy. A variety of much value, on account of its great hardiness and good quality. October.

Winter Apples

Baldwin—Large, roundish, skin deep red; flesh juicy, crisp, sub-acid, good flavor. Very vigorous and productive. The best all around Apple for New England and the Northern states. Keeps splendidly. December to March.

Ben Davis—A large, handsome, striped apple, of good quality. Tree very hardy and productive; a late keeper; highly esteemed in the West and Southwest.

Boiken—Medium size; yellow, tart, acid, long keeper. A very good cooking apple.

Fallwater—A very large and handsome apple; quality good. Bears young and abundant. November to March.

Golden Russet—Medium to large size, dull russet, with a tinge of red on the exposed side; flesh greenish, crisp, juicy, and high flavored; hardy, bears well. November.

Grimes' Golden—Medium to large size; skin golden yellow, with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Grown in South and Southwest. January to April.

Hubbardston Nonsuch—Large; striped yellow and red; tender, juicy, and fine; great bearer. One of the best. November to January.

BALDWIN APPLE

Jonathan—Medium size; red and yellow; flesh tender, juicy and rich; very productive. One of the best for either table or market. November to March.

King—Large and handsome, striped red and yellow; tree vigorous and productive.

Mann—Medium to large, deep yellow, with a brownish red where exposed; juicy, mild, pleasant. Tree hardy and upright grower; an early and annual bearer and a late keeper. January to April.

McIntosh Red—Large, bright red; flesh white, tender, sub-acid. A handsome apple of fine quality, hardy. November to January.

Newtown Pippin—One of the most celebrated of the American apples on account of its long-keeping qualities, and the high price it commands abroad. Medium, roundish, juicy, crisp, aromatic flavor. November to June.

Gano—An Apple with a very great future. A fine commercial sort. Very hardy. A half brother to Ben Davis, though of better quality. Very richly colored, uniform in size; keeps until March; rapid grower, fruit very handsome, flesh pale yellow, mild, sub-acid, good. Large, good marketing and keeping.

Northern Spy—Large striped, and quite covered on the sunny side with crimson, and delicately coated with bloom. Flesh juicy, rich, and retains its freshness of appearance and flavor till June.

Northwest Greening—A very good keeper, of fair quality. Very large and productive.

Pewaukee—Raised from the seed of Oldenburg. Fruit medium to large; skin bright yellow, striped and splashed with dark red; flesh white, tender, juicy, sub-acid. A very good variety for cold climates, on account of its hardiness. January to May.

Rambo—Medium size; streaked and mottled yellow and red; juicy, mild flavored. Tree a vigorous grower and a good bearer. A widely cultivated and esteemed old variety. Autumn in South. October to January in North.

Rhode Island Greening—Everywhere well known and popular; tree spreading and vigorous; always more or less crooked in the nursery; a great and constant bearer in nearly all soils and situations; fruit rather acid but excellent for dessert and cooking. Keeps well until April.

Rome Beauty—Large, yellow and bright red; handsome; good quality; good bearer. December to March.

Talman's Sweet—Medium size; pale, whitish yellow, slightly tinged with red; flesh firm, rich and very sweet; excellent for cooking.

Twenty Ounce—A large, showy striped apple, of fair quality. Tree a fine grower and a good bearer; excellent for baking and a very fine flavor; a good market apple. October to January.

Wagner—Medium to large size; deep red in the sun; flesh firm, sub-acid and excellent. Tree a good grower, and very productive.

Seek-No-Further—Medium to large; dull red color; flesh crisp, tender and juicy. November to February.

Wine Sap—Large; roundish; deep red; medium quality; good keeper. Tree a good bearer, succeeds well in West, and is there valuable and popular. December to May.

Winter Banana—Large; clear pale yellow, with beautiful pinkish red blush, good for dessert. Bears young.

York Imperial—Generally known and popular with many of our most experienced orchardists. Tree moderate grower and productive; fruit large, lopsided, surface smooth; color mixed bright red on yellow ground. Flesh yellowish, tender, juicy. Flavor mild, sub-acid. Quality very good. Fine for market, table and kitchen use.

Auburn, N. Y., Apr. 19, 1909.

Reilly Bros. Dansville, N. Y.

Dear Sirs: The trees you sent, I received on Saturday last. They were in good condition. Would you advise trimming the tops in any way?

Yours truly,
F. A. Cole.

Norwich, Conn., May 8, 1909.

Reilly Bros., Dansville, N. Y.

Dear Sirs: Received the trees all right and set them out. They were in fine shape and very satisfactory every way.

Mrs. Michael Brennan.

Greshill, Pa., May 9, 1909.

Reilly Bros., Dansville, N. Y.

Dear Sirs: I received the clematis plants and rambler, all safe, and was well pleased with them.

Yours sincerely,
Jonathan G. Hoffman.

Price List of Fruit Trees and Small Fruits on Last Page

Pears

The growing of Pears cannot be urged too strongly. They thrive in a great variety of soils and the fruit by far surpasses the apple in rich, juicy flavor. By a judicious selection of sorts, ripening in succession, Pears may be had from July until March or April of the following year. We have for a number of years given the growing of Pear trees our closest attention. The great increase in orders and the many letters we receive praising our trees, make us believe we grow the best Pear trees in the country.

Gathering Pears—One of the most important points in the management of pears is to gather them at the proper time. Summer pears should be gathered at least ten days before they are ripe, and Autumn pears at least a fortnight. Winter varieties, if they will hang so long, may be left until the leaves begin to fall.

Thin the Fruit—We cannot urge too strongly the following suggestion: when pear trees are heavily laden, the fruit should be thinned when about one-third grown; else the fruit will be poor and the trees injured.

Standard Pears. Summer Varieties.

Bartlett—Large, coloring when fully ripe waxen yellow, with red blush. Juicy, melting, high-flavored. The tree bears early and abundant. One of the finest eating pears and extra fine for canning. The most popular sort, both for home use and market.

Clapp's Favorite—A superb, large, long, yellow pear, richly flushed with russet-red next the sun; juicy and delightful; ripens before Bartlett. Pick the fruit of this variety at least ten days before it would ripen on the tree. Aug.

Doyenne D'Ete—Small, yellow, shaded with red; melting, sweet and delicious. The tree is robust and healthy. Early Aug.

Early Harvest—Of good size and color; quality fair. Remarkably productive in the South, where it is the best early market variety.

Koonce—A very popular early variety. Fruit medium to large, yellow, one-half nearly covered with red. Does not rot at the core. Tree vigorous, free from blight, upright, handsome grower. Very productive and a good shipper.

Lawson—Tree healthy, a strong grower, early bearer, and profitable sort; of splendid quality for a very early pear. Red cheek with yellow shading.

Tyson—Medium in size, yellow, with russet shading; melting, sweet, rich and aromatic. August.

Wilder—One of the very earliest pears, attractively colored and of excellent quality, this new variety always finds a sale in market and is largely grown by commercial orchardists. Of medium to large size, irregular, bell-shaped, but with smooth surface; pale yellow with shadings of russet-red. The tree bears good crops early and annually. Early August.

Autumn Varieties

Beurre Clairgeau—Very large, pyriform; yellow and red; nearly melting, high-flavored. Tree a very good grower, an early and abundant bearer; a magnificent market fruit. One of the finest acquisitions. October and November.

Beurre d'Anjou—A large, fine Pear, buttery and melting, with sprightly, vinous flavor. Tree a fine grower and good bearer. Keeps into mid-winter. The most valuable Pear in our list. Oct. to Jan.

Duchess D'Angouleme—Among the largest of all our really good Pears. greenish yellow, splashed with russet; flesh white, juicy, rich flavored. It succeeds well as a standard, but grown as a dwarf is the most profitable and luscious of all market varieties. We recommend it also for the home garden. October and November.

Flemish Beauty—This fine old Pear is still one of the hardiest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit that is exceptionally good in quality. Sept. and Oct.

Garber—One of the Japan Hybrids; larger than Kieffer; hardy, productive, early bearer; excellent for canning. September and October.

Howell—Large, yellow, with red cheek; early bearer, and productive. September and October.

Rossney—A new and excellent Pear, raised from seed at Salt Lake City, Utah. In size medium to large; very fine grain, flesh melting, juicy, very sweet. Ripens two weeks after Bartlett; it is an excellent keeper and shipper, with tree much stronger than Kieffer. It is very seldom you can find a single variety combining so many rare qualities as this does, and we have great pleasure in offering it as the best Pear on the market at the present time.

FLEMISH BEAUTY.

Seckel—A beautiful and delicious little Pear that is the standard of excellence in its class. One of the richest and highest-flavored Pears known, always in demand for desserts and luncheons, and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. September and October.

Sheldon—A large, round, russet-and-red Pear of the very first quality. Hardy, free-growing, fruitful. October.

Vermont Beauty—Of medium size, roundish, yellow, heavily shaded with carmine; flesh exceedingly fine, sweet and juicy. The tree makes a strong, healthy growth and bears good crops. October.

Worden-Seckel—A worthy seedling of the famous old Seckel, quite as sweet and luscious with the same rare flavor and aroma. Is superior to the Seckel in size, beauty and keeping qualities. The fruits are beautifully smooth and regular, golden yellow with russet-red cheek, and sometimes keep from October until Christmas. The tree makes a more rapid and upright growth than Seckel and excels it in productiveness.

Winter Varieties

Lawrence—About medium; yellow, thickly dotted, with a very fine, rich flavor. Tree a moderate grower and very productive. Dec. to Jan.

Lincoln Coreless—Keeps well until middle of March. Very large, handsome, of good quality, and with but few, if any seeds. Distinguished for its very small amount of core and seed, some specimens being almost entirely without either. Color golden yellow.

Kieffer—One of the best market varieties and an excellent keeper. This superb variety is often underestimated, because large quantities of it are shipped to market in immature condition and before the fruit has attained proper size. However, there are few Pears that are more attractive than the Kieffer, if it is allowed to hang on the tree until the beginning of October, and is then carefully ripened in a cool, dark room. If handled in this manner the quality of the flesh is the best, exceedingly juicy, and of sprightly sub-acid flavor. Kieffer Pears are being planted more and more by the largest commercial fruit growers of the country and this fact is sufficient proof, that the merits of this excellent sort are more and more recognized. The trees are apt to set too much fruit, and in order to obtain choice fruit of large size, it should be thinned early in the season. For best results, one-tenth of a Kieffer Pear orchard should be planted with LeConte Pears, as this is the best pollenizer.

LeConte—Vigorous and prolific sort. Fruit large, with smooth, yellow skin; flesh juicy and firm. Good shipper.

Pres. Drouard—Large, melting, juicy with delicate perfume. November and December.

Winter Nelis—One of the best early winter pears; medium in size and has dull russet color; rich and sprightly flavor, and bears very heavy crops.

Reilly Bros., Dansville, N. Y.

Marathon, N. Y., May 6, 1909.

Dear Sirs: I set the nursery stock which I bought of you, yesterday, and am very pleased with the trees.

Very truly yours,

Simon W. Carter.

Reilly Bros., Dansville, N. Y.

Siddonsburg, Pa., May 3, 1909.

Dear Sirs: Received trees Saturday May 1, 1909, which were shipped from your nursery April 13, 1909. I showed the trees to my neighbors and they all thought they were as nice as any trees could be bought and they were packed excellently. I think they are first class in every way.

Yours truly,

C. S. Grove.

Price List of Fruit Trees and Small Fruits on Last Page

DWARF DUCHESS

Dwarf Pears

Our Dwarf Pears are all budded on whole quince stock imported from France. The cultivation of the Dwarf Pear is perhaps more profitable than any of the other fruit. For low-headed trees, convenience, and to have fruit in two or three years after planting, the Dwarf Pears have their place in the garden as well as in commercial orchards. In planting Dwarf Pears we would especially recommend the Duchess. One of our customers writes that from a five-year-old orchard of fifteen hundred trees Duchess Dwarf, the crop was sold for \$1820.

We can furnish the following varieties in Dwarf; for description see Standard Pears:

ANJOU, DUCHESS, D'ANGOULEME, BARTLETT, CLAPP'S, FLEMISH BEAUTY, KIEFFER, KOONCE, SECKEL, TYSON, WILDER.

BLACK TARTARIAN

Cherries

The cherry does its very best on dry sandy soil. There is no other crop that can be grown with less care and expense; no fruit in larger demand or sells more profitably. There are two classes of cherries, the heart and bigarreau or Sweet, and the Duke and Morello, or Sour cherry.

We are one of the largest growers of Cherry trees in the country and as this has been an extra good year for us, we have to offer to our customers, some of the finest cherry trees we have ever grown. The soil in and around Dansville is particularly adapted to the growing of Cherry and Plum trees. About one-half the Cherry and Plum that are raised in the United States are grown in Dansville, and we raise about half the Dansville out put.

WE STRONGLY RECOMMEND THE PLANTING OF ONE YEAR CHERRY TREES.

Select Varieties Sweet Cherry

Bing—This desirable popular cherry originated in Oregon, is one of the grandest black Cherries in existence today. Its large size, firmness and delicious flavor have caused it to be in active demand by shippers and canners alike. The tree is a remarkably thrifty, upright grower and a prolific bearer.

Black Eagle—Large black; very tender, juicy, rich and high flavored; tree vigorous and productive. July 1st to 15th.

Governor Wood—Large, yellow with red, sweet and juicy. Tree a good healthy grower. Probably the best and hardiest of the sweet cherries for the west.

Yellow Spanish—(Bigarreau.) Fruit very large, pale yellow with bright red cheek when exposed to the sun; flesh firm, juicy and delicious. Very popular and good market cherry. Ripens late in June.

Black Tartarian This fine old variety produces immense crops of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth. Late June and early July.

Schmidt's Bigarreau—Fruit of immense size, rich deep black; flesh dark, tender, very juicy, with a fine flavor; bears abundantly.

Windsor—New; originated in Canada. Fruit large, liver colored; flesh remarkably firm and fine. Tree hardy and very prolific. A valuable late variety for market and family use.

Napoleon Bigarreau—A magnificent cherry of the largest size, pale yellow, becoming amber in the shade, richly dotted and spotted with deep red, and with bright red cheek; flesh very firm, juicy and sweet; tree a rapid grower and immense bearer. The most popular all around cherry for canning, preserving and shipping.

Lambert—This very promising cherry, of the largest size and bright rich color, is deserving of all that has been said of it by the introducer. The surface is smooth, glossy, and is covered with minute russet dots; flesh reddish with whitish veins, very firm and of unsurpassed quality. Stands well in the lead as a shipping variety.

Yellow Spanish—Large pale yellow, with light red cheek; firm and delicious. Late June.

Select Varieties Sour Cherries

Baldwin—Fruit very large, almost round, dark red, the sweetest and richest of the Morello type. Remarkable for its quality, vigor, hardiness and productiveness. Particularly profitable in the West. June.

Dyehouse—Ripens several days before E. Richmond is of good quality and very productive. Fruit of medium size, color red. Fine for preserving and cooking purposes.

Early Richmond—This is a hardy cherry, fruiting on young trees soon after planting and bearing regularly every year enormous crops of dark red fruit that does not rot upon the trees and can be left without picking longer than most varieties. One of the very best for canning and profitable for market. June.

Large Montmorency—The most popular of all hardy cherries for market or home use. The fruit is in great demand and sells at fancy prices. Montmorency has been growing in popularity all over the country each year, so that it has been almost impossible to grow trees fast enough to keep up with the demand. It is of large size, dark red in color, stem rather short. Tree is a very healthy and vigorous grower. Some of the large planters have whole orchards of this one variety.

English Morello—Very dark red, acid, of good quality, and owing to its rich red color looks much better when canned than the Early Richmond. Ripens from July 4th to 15th. Bears very young.

May Duke—An excellent variety with large, dark red fruit; flesh juicy and rich, almost sweet. Tree is rather dwarf in habit.

EARLY RICHMOND

Louis Phillip—Large and beautiful fruits of blackish red; flesh tender; mildly acid. One of the best. Mid—July.

Late Duke—Large, light red, excellent. A valuable late variety. End of June.

Reine Hortense—Fruit very large, bright red, juicy and delicious. The sweetest of this variety. July.

Ostheimer—A perfectly hardy, very late blooming variety from Germany. Fruit large, heart shaped, nearly black when ripe; flesh juicy and rich. Fine for dessert and cooking, also finds ready sale on all markets. Does well in the West. Ripens in July.

Wragg—Originated in Iowa and has become very popular in the northwest and western states. Fruit medium to large, dark red and of fine quality. Tree is very hardy, vigorous and productive. This is one of the few cherries of good commercial quality that is perfectly hardy. Ripens in July.

Montmorency Ordinaire—Fruit large, red, quite handsome; ripens late in June. The tree is hardy and very prolific. A valuable market variety.

Athens, Ohio, April 26, 1909.

Reilly Bros., Dansville, N. Y.

Dear Sirs: Trees received in good shape. Have been growing and selling nursery stock for over 20 years and will say I never saw a nicer lot of plum, cherry, pear and other stock; certainly the best rooted trees I ever saw.

Thanking you I am sincerely,

W. P. Elliott.

Biddeford, Me., April 26, 1909.

Reilly Bros., Dansville, N. Y.

Dear Sirs: My trees came Saturday the 24th, and I will say they were the best lot of trees that I ever bought and came packed in the best shape. Not a tree barked and in fine condition to set out. I shall surely place my orders with you in the future and advise everybody else to. Your trees were far superior to any that I have bought this Spring either from W. F. C. or C. Brothers.

Yours respectfully,

Thomas Perkins.

Battle Creek, Mich., Apr. 15, 1909.

Reilly Bros., Dansville, N. Y.

Dear Sirs: The trees arrived in due time, and in excellent condition. In quality they are certainly first class.

Yours truly,

Mrs. Sanders.

North Water Gap, Pa.

Reilly Bros., Dansville, N. Y.

Dear Sirs: I received the trees all right and in good shape. Thanks for the apple trees.

Yours truly,

Robert Trach.

Maynard, N. Y., May 1909.

Reilly Bros., Dansville, N. Y.

Dear Sirs: I have received my trees and am very well pleased with them, and I will send money order tomorrow.

Yours Respectfully,

A. Kaufman.

Topsham, Me., May 12, 1909.

Reilly Bros., Dansville, N. Y.

Dear Sirs: My trees arrived in good condition. I am much pleased with them.

Very truly yours,

B. A. Cromwell.

Price List of Fruit Trees and Small Fruits on Last Page

EARLY RIVERS PEACH

Peaches

Every owner of a piece of land, even though no larger than a town lot, should plant a few trees at least. No other fruit trees produce fruit so quickly and abundantly. No other fruit is so universally popular among all classes and in all markets. Planted in commercial quantities in suitable soil and location, no other fruit is more profitable to the grower. On town and city lots, as well as in all family plantations, peach and cherry should predominate; with very little attention the trees may be grown into beautiful specimens, fitting ornaments to any grounds. But the supreme satisfaction to the planter of a peach tree comes with the ripening fruit—great globules of delicious, juicy fruit, so far superior to the green-picked, distance-shipped peach as to be scarcely recognizable as the same fruit.

Peaches can be grown successfully on a great variety of soils, but we prefer a rich, sandy loam. Worn-out land can be made profitable peach land if a liberal use is made of wood ashes, or a mixture of ground animal bone and muriate of potash.

In planting, always cut back the stems of young trees about one-third and cut side branches to a single bud. Yearly pruning is necessary to keep the heads low and well furnished with bearing wood, for the fruit is borne on wood of previous season's growth.

Select Peaches

Alexander—Medium to large, pale green, heavily flushed with red; white-fleshed, tender and juicy. One of the largest and best extra early varieties. Mid-July.

Beer's Smock—A large yellow fleshed peach, similar to Smock Free, but superior to it. Ripens a few days later and is a better annual bearer. One of the most profitable market sorts. Late September.

Crawford's Early—This beautiful yellow peach, is highly esteemed for market purposes. Fruit very large, oblong, skin yellow with fine red cheek;

flesh yellow, juicy, sweet and excellent. One of the very finest and most profitable. Late August.

Crawford's Late—Fruit of the largest size; skin yellow or greenish yellow, with dull red cheek; flesh yellow; productive; one of the best. Late September.

Grosby—Fruit medium size, rich, orange yellow splashed with carmine on sunny side; perfect freestone, pit small; flesh yellow, tender, juicy, sweet and rich. Very hardy. September.

Garman—A superb Peach of the Elberta type, new, but already a leader for general market and long-distance shipping. Quite large, creamy yellow, with deep blush; skin very tough, protecting the tender, spicy, juicy flesh, which distances in quality that of nearly all other peaches. The tree is very hardy in bud, grows and produces well, ripening its profuse crops in August.

Chair's Choice—Of largest size; deep yellow, with red cheek; flesh very firm, ripening five days earlier than Smock. Makes a strong, profuse-cropping tree. September

Champion—Unusually large, some specimens measuring 10 inches in circumference. A sweet, rich, juicy freestone, beautifully colored with creamy white and crimson; a good shipper. Hardy, productive, profitable. August.

Elberta—Here is the king of market peaches! An exceedingly large, light-colored yellow peach with red cheek. Flesh yellow. This is truly a fine peach, noted for its large size and fine appearance. The tree is vigorous and very productive. No other peach has made such a name for shipping, and none is cultivated more extensively. It is the ideal market peach, and a royal fruit. The fruit market has never yet had too many of this sort. A perfect freestone. Commercial growers have made more money on this variety than on all others. September 10th to 15th.

ELBERTA

Early Rivers—Large, light straw color, with delicate pink cheek; flesh juicy and melting, with very rich flavor. Early August.

Fitzgerald—A particularly hardy variety, originating in Canada where it succeeds most admirably. Particularly adapted to cold climate. Young trees begin to bear the second year from planting. The fruit is large, bright yellow, suffused with red; flesh deep yellow and of best flavor. Last of August.

Foster—Large, deep orange red, becoming very dark red on the sunny side; flesh yellow, very rich and juicy, with sub-acid flavor. Ripens with Early Crawford. Very handsome.

Greensboro—Skin beautiful crimson with a yellowish cast, flesh white, very juicy, and of extra quality for so early a peach. August.

Hill's Chili—Medium size; oval; skin yellow, shaded with dark red; flesh half melting, sweet, of medium quality. September.

Large Early York—A large and beautiful variety, white with a red cheek; flesh juicy and delicious. End of August.

Lord Palmerston—Very large; skin creamy white, with a pink cheek; flesh firm, yet melting; very juicy and rich. End of September.

Morris White—Medium size; dull creamy white, tinged with red in the sun; flesh white to the stone, juicy and delicious. Middle of September.

Mountain Rose—Large, roundish; skin whitish, nearly covered with dark red; flesh white, juicy, very good; freestone. An excellent early market variety.

Niagara—Originated in Western New York, where it has been well tested, surpassing both Elberta and Crawford in size, color, quality and vigor. Middle of September.

EARLY CRAWFORD

Oldmixon Free—Large; greenish white and red; flesh pale, juicy and rich. Tree hardy and productive; a most valuable variety. Succeeds Crawford's Early.

Rivers—Large; color creamy white, with a delicate pink cheek; flesh melting, or rather dissolving, with a rich, racy flavor. One of the finest early peaches.

Stump the World—Red and white, handsome, good size and fair quality. Very productive. End of September.

Salway—Large, creamy yellow, crimson red cheeks, flesh deep yellow, juicy, rich, sweet. October.

Wheatland—A large golden yellow peach; sweet, juicy and of fine quality. Ripens between Early and Late Crawford.

Reading, Pa., May 5, 1909.

Reilly Bros., Dansville, N. Y.

Gentlemen: I received the box of trees from you and everything is in first-class condition and am very well pleased. Enclosed please find check for \$8.50. Kindly receipt and return. Any time I can make a sale for you, you shall be favored with the order.

Yours,

Franklin Fisher.

Price List of Fruit Trees and Small Fruits on Last Page

Japan Plums

The value of this race of Plums is no longer in doubt. Trees of tremendous vigor, they come into bearing two and three years after planting and in such variety and season of ripening as to cover a period of three months with a daily supply of luscious Plums. They are beautiful in appearance, superior in quality and many of them will keep from ten days to two weeks, after picking, a great point in their favor in marketing. Like the Peach the trees grow so fast and bear so heavily that they have a tendency to be short lived. Growers should keep planting trees each year so as to keep up the supply. The trees produce so abundantly that some have feared a glut of the fruit and planting for the last year or two has fallen off, but we predict larger returns from the fruit in the next few years for those who stick to them and keep planting. We would especially recommend Burbank Red June, and Abundance.

We have to offer this year the largest and best supply we have ever grown. The following is a list of the best tried varieties.

ABUNDANCE

Abundance—Of medium size, large when thinned; amber with markings of red; juicy, sweet, of good quality when ripened. May be picked when it begins to ripen; will keep a long time, color well and be almost as rich as if ripened on the tree, a strong point for market growers. Aug.

Burbank—The best and most profitable among growers for market; ripens from seven to ten days after Abundance. Tree hardy, sprawling, vigorous grower, unequalled in productiveness; bears young. Fruit large, excellent quality; cherry red, with lilac bloom. Aug.

Climax—Tree extremely vigorous, upright, with strong branches and very large leaves. Productive as Burbank, about as large and usually two or three weeks earlier.

October Purple—Originated by Burbank, who regarded it as one of the best introduced. Fruits on the old wood and frequently measures seven inches in circumference. Tree a strong erect grower, forming a shapely head.

Red June—The great early market Plum. Fruit large, deep red,

very showy; flesh lemon yellow; slightly sub-acid, of fine quality. We can recommend this variety very highly to our customers. Aug.

Satsuma—Large, nearly round, purplish-red; flesh firm, juicy, dark red. A delicious Plum for canning, and a good market sort.

Sultan—A large handsome Plum of purplish-crimson color; excellent for cooking and preserving. Keeps long and ships well.

Wickson—Fruit remarkably handsome, very large, long, heart-shaped, color deep maroon red. Excellent keeper and shipper. Some of the largest planters are planting this variety by the thousands.

European Varieties

Beauty of Naples—A new variety of great promise. Fruit of large size, light yellow when fully ripened. Flesh firm; juicy, and very fine flavor. Ripens the middle of Sept.

Coe's Golden Drop—Large and handsome; light yellow, firm, rich and sweet. One of the best of late Plums. Last of Sept.

Fellenburg—(French or Italian prune.) A fine late Plum. Fruit handsome of oval shape and purple color. Flesh thick, juicy and delicious; parts from stone. Excellent for drying and preserving. Very productive, ripens in Sept.

GERMAN PRUNE

German Prune—A valuable Plum of fair quality for dessert, but most esteemed for drying and preserving. Large, long-oval, purple with a thick blue bloom; flesh firm, sweet and pleasant, separating from the stone. Moderate to vigorous in growth. September.

Bradshaw—A very large and fine early Plum; dark violet red; juicy and good. Very productive. This is one of the best profitable market varieties.

Cady—Large, bluish purple, flesh yellowish green, rather coarse; sweet, pleasant. One of the best market varieties. Sept.

Grand Duke—A very valuable late Plum, as large as Bradshaw, of same color and ripens latter part of September.

French Damson—Large for this type of Plum, dark coffee color foliage, very healthy.

Imperial Gage—This is one of the very best plums, above medium size, oval, golden green; flesh juicy, rich and delicious, free from stone.

Lombard—This is one of the best

and most profitable Plums for market, tree grows vigorously, adapts itself readily to all soils and bears well. Fruit is medium to large; dark red; flesh yellow of pleasant flavor. Late Aug.

Moore's Artic Medium; skin purplish-black; juicy, sweet and pleasant flavor; claimed to be the hardiest Plum grown and free from black knot.

Monarch—Tree very thrifty, hardy, healthy and handsome. Fruit large size; dark purple; nearly round; flesh pale yellow. An early and regular bearer.

Shippers Pride—Quite large and showy, frequently 2 inches in diameter, oval, dark purple, of Damson type. Noted for its excellent keeping and shipping qualities. Sept.

Shropshire Damson—A medium size, dark purple variety; esteemed for preserving. Very productive. Oct.

Niagara—Unsurpassed for beauty and productiveness as well as great hardiness of tree, with foliage so perfect as to contribute in an essential degree to its health. Fruit large, oval, often with a slight neck; skin reddish purple; flesh yellow, juicy and good. Its beauty as a market sort is unsurpassed.

Reine Claude Large; greenish yellow, spotted with red; firm, juicy, sugary, of fine quality; very productive. September.

Yellow Egg—A large and beautiful egg-shaped yellow Plum. A little coarse but excellent for cooking. Very productive. End of August.

York State Prune—This Prune originated here in Dansville. is much larger than either the German or Italian Prune, of same color or shape.

Quinces

During the past few years the quince has been attracting much attention among orchardists; tree a very hardy, healthy grower; does well on any kind of soil. Some of the best quince orchards are growing on heavy clay soil.

An Annual Bearer—The quince is a sure every-year bearer, it does not form its fruit-buds the previous year, as the peach and most other fruits do, but they come on in little shoots that start early in the spring and make quite a growth before its blossoms appear, which come very late hence the buds are never killed by severe cold in winter or late spring frosts.

ORANGE QUINCE

Our Select Varieties of Quince

Bourgeat—Tree a remarkably strong grower, surpassing all others, yielding immense crops, fruiting in nursery rows. Fruit very large, rich, and golden colored. A good keeper.

Champion—A prolific and constant bearer, fruit larger than orange, quality equally fine and a long keeper. Ripens late.

Orange—Fruit very large, bright yellow, has an excellent flavor.

Meech—Fruit is large orange yellow, of great beauty and delightful fragrance. Tree a vigorous grower and immensely productive.

Apricots

Apricots are a rich delicious fruit, coming between cherries and peaches;

very much like the peach in outward appearance, but like the plum in texture and quality. One of the finest fruits for drying, and they fill a season when there are no other large fruits.

Alexander—Very hardy; an immense bearer; fruit large; yellow, flecked with red; very beautiful, sweet and delicious. July.

Alexis—Very hardy; an abundant bearer; yellow, with red cheek; large, slightly acid, rich and luscious. July.

J. L. Budd—Tree a strong grower and profuse bearer, fruit sweet, juicy, with a sweet kernel, as fine flavored as an almond; the best late variety.

Mulberries

The mulberry is valuable not only on account of its fruit, but as a desirable shade tree. It is of easy culture, requiring little or no pruning.

Downing's Everbearing—One of the most prolific varieties. Fruit very large, black, sweet and rich in flavor. Its long bearing season has made it a universal favorite. Ripens fruit during 6 to 8 weeks.

New American—Tree very vigorous and productive, surpassed by none. Continues in bearing a long time. Fruit $1\frac{1}{4}$ inch long and nearly half inch in diameter: color maroon or an intense blue-black at maturity: flesh juicy, rich, sugary. Ripens from the middle of June up to the middle of September.

Russian Mulberry

Introduced here by the Russian Mennonites. Trees very hardy, stood 40 degrees below zero and bore a full crop of berries the next season. They are an annual and abundant bearer. The fruit is from white to pink and some black in color, and from very sweet to quiet tart in taste. Canned with gooseberries or rhubarb they make a good sauce, relished by most everybody. Chicken raisers should plant largely of this tree near the chicken house or yard, as they will soon make a nice shady place for the chickens, and the berries are much relished by the fowls and are very healthful. Try it and you will be pleased, and your chickens more so. The wood is very valuable for fence posts, lasting for 20 year in the ground. They also make a pretty hedge if planted about ten inches to one foot apart, and kept well pruned the first few years.

Nut Trees

Almonds

Hard Shell—The tree is very showy when in bloom. The kernels of the nuts are large, plump and sweet. Hardy.

Soft, or Paper shell—Encloses as fine a nut in a softer shell. Needs protection.

Chestnuts

American Sweet—The nuts of this tree form quite an item in our commerce. Although smaller than some other sorts, they are sweeter and more delicately flavored. This Chestnut is also a grand timber and ornamental shade tree spreading, in midsummer, billowy masses of creamy fragrant catkins above its large, deep green leaves, making a most beautiful specimen on the lawn.

Spanish—A handsome, round-headed tree, producing abundant crops of very large nuts that sell readily for good prices. The crop of a single tree has sometimes brought \$25. Not so sweet as the American in nut, and not so hardy in tree.

Hickory

Shellbark—In flavor and quality of kernel this is generally esteemed the choicest of our native nuts,—of all nuts, some experts have said. The tree is a handsome, stately shade tree, with tough white wood of great strength and elasticity, marketable at high prices.

Butternut—A native tree valuable for timber, and bearing an oblong, thick-shelled nut of delicious flavor.

Walnut, Black—A native tree of large size and majestic form. The most valuable of all trees for its timber. Tree a rapid grower, producing a large, round nut of excellent quality.

Walnut, English—It produces immense crops of thin-shelled delicious nuts. Fruit in green state is highly esteemed for pickling. Not entirely hardy.

Walnut, Japan (Sieboldi)—Perfectly hardy, rapid growing, handsome form, immense fern-like leaves, making one of the finest ornamental trees; bears young and abundantly. Nuts produced in clusters and resemble butternuts in shape and quality, but somewhat smaller and with thinner and smoother shell. Worthy of extensive planting.

Grapes

Our grapes are first-class, two year well rooted vines.

There is scarcely a yard so small, either in country or city, that room for one or a dozen grapevines cannot be found. They do very well trained up to the side of any building, or along the garden fences, occupying but little room and furnishing an abundance of the healthiest fruit. A handsome profit can be realized on grapes planted on hill-sides too steep for other crops. Plant about 8 feet apart, by the fence or building. For vineyards, make rows 8 feet apart, 6 to 10 feet in rows.

SHOWING TWO
YEAR GRAPE

Black Grapes

Concord—A well known standard variety, succeeds wherever grapes will grow.

Campbell's Early—Strong grower, with large healthy foliage; productive; good keeper and is equalled by no other early grape for shipping qualities.

Eaton—Bunch large. Berries very large, round, black, covered with a thick blue bloom; very juicy. A large showy grape.

Early Ohio—Very early, hardy and productive, strong thrifty grower; excellent shipping qualities. A profitable early market sort.

Moore's Early—A very early and excellent hardy variety. Fruit of large size and good quality. Ripens about two weeks earlier than Concord.

Worden—A seedling of the Concord. Bunch large and handsome; berries large. Very popular for vineyard and garden.

White Grapes

Diamond—The leading early white grape, ripens before Moore's early. White with rich yellow tinge; juicy, few seeds, almost free from pulp, excellent quality; above medium size. Fine variety for both market and home garden.

Empire State—Very large bunch, medium size berries, juicy, rich sweet and sprightly; continues for a long time fit to use.

Green Mountain (Winchell)—An extra early variety from Vermont. Skin thin, pulp tender and sweet, quality superior. A good wine grape.

Niagara—Occupies the same position among the white grapes as Concord does among the black. A leading profitable market variety.

Pocklington—One of the most satisfactory white varieties. Bunch and berries large. Vine thoroughly hardy, strong grower, free from mildew; productive.

Red and Reddish Purple Grapes

Agawan—Berries, very large, with thick skin; pulp soft, sweet and sprightly very vigorous, ripens early.

Brighton—This valuable variety is one of the very best in quality. It is equal to or better than the Delaware, larger in size and ripens a week to ten days earlier. The vine is a strong grower; foliage rich and glossy and the many tests it has gone through indicates that it has no superior for vigor, freedom from disease and abundant crops of handsome luscious fruit.

Catawba—Bunches large and loose; berries large, of copper red color, becoming purple when ripe. This variety requires good culture and warm seasons to mature perfectly in Western New York.

Delaware—One of the finest of our native grapes. The vine is comparatively slender, but grows freely, and is perfectly hardy in this climate: ripens early. Bunches small and compact: berries small and light red with a violet bloom.

Wyoming—Vine very hardy, and robust, with thick, leathery foliage; color of berry similar to Delaware, but brighter, being one of the most beautiful of the amber or red grapes, and in size nearly double that of the Delaware; flesh tender, juicy, sweet, with a strong native aroma. Ripens before Delaware. The best early market variety.

Gooseberries

The Gooseberry requires the same cultivation and treatment for worms as the currant. The worm attacks the Gooseberry before the currant bushes, and should be closely watched as soon as the growth gets a few inches long. Dust or sprinkle the leaves with hellebore as soon as the first worm is discovered, or about the 10th or 12th day of May. These worms come three times during the season, and should be closely watched through the summer.

DOWNING GOOSEBERRY

Downing—Fruit smooth, larger than Houghton, roundish, light-green with distinct veins; flesh rather soft, juicy and very good. The most valuable American variety.

Pearl—A very productive and perfectly healthy variety, quite free from mildew. Pearl is a favorite and hard to beat; bushes planted but one year are said to yield three quarts of berries. A robust, vigorous grower, larger than Downing, and of excellent quality.

Houghton's—Small to medium: roundish, oval, pale red, sweet, tender, very good; plants spreading; shoots slender, enormously productive.

Red Jacket—Bright red; medium size; healthy and very productive.

Chautauqua—The bush is strong and vigorous, berries light yellow; free from spines and hair; veined and transparent; very sweet and delicious. Fruit 1 to 1½ inches in diameter.

Currants

Currants can be successfully planted in the fall or spring. Being perfectly hardy, they do not suffer injury from the winter. To destroy the currant worm, dust the plant with white hellebore, when they are wet with dew. Care must be taken not to breathe the hellebore, as it causes violent sneezing.

CHERRY CURRANTS

bright, attractive red colors, even when dead ripe; hangs on bushes in fine condition for handling as late as any known variety.

Black Naples—The best black currant for all purposes; will stand most any climate; valued by some for jellies; it is very productive and hardy.

Red Cross—A fine variety of large size, long clusters, and mild pleasant flavor. Productive.

Versailles—Very large, long bunch, brilliant red and of great beauty. Excellent quality.

Victoria—This grand late red variety is one of the best. On rich land it is about as large as Cherry. Bunch very long and tapering; slightly acid, good flavor; ripens late; berries firmly set and remain on the bush a long time in perfect clusters.

White Dutch—An excellent and well-known sort.

White Grape—A fine white variety; mild flavor; excellent quality, good for table use; very distinct and valuable.

Blackberries

Blackberries should be planted in rows six to seven feet apart, three to five feet in the row. Pinch the canes when they have reached four feet in height and cut out all dead wood.

Early King—Ripens with Early Harvest and claimed to stand Northern winters without protection. It is very productive, berries of large size for an early variety. An extra early, hardy variety of great merit.

Cherry—Berries sometimes more than half an inch in diameter. A free grower and abundant bearer; profitable for market; one of the best of old sorts.

Fay's Prolific—The leading market variety. The fruit is very large and handsome, uniform in size, easily picked, exceedingly productive.

Pomona—This valuable variety originated near Indianapolis about ten years ago, and is grown almost exclusively by growers in that section for commercial purposes. The berry is medium to large, bright red and of excellent quality. It hangs on the bush a long time after ripe and is one of the best shipping varieties.

Wilder—A remarkable variety, for which we predict great popularity; both for table and market. One of the strongest growers and most productive. Bunch and berries very large,

Early Harvest—One of the most valuable where it succeeds, is not very hardy in the north and needs winter protection. It is one of the first to ripen and is an abundant bearer.

Erie—A very hardy variety; free from rust; very large and of good quality.

Rathburn—Berries extra large, jet black, good quality.

Snyder—Extremely hardy, enormously productive; medium size; no hard, sour core; sweet and juicy. The leading variety where hardiness is the consideration. Ripens early.

Taylor—Very hardy and productive, large and of excellent quality.

Mersereau—This variety was originated in Western New York, where the mercury falls below zero each winter. It has been well tested and found to be perfectly hardy. It makes very large canes, is very productive, of large size, delicious quality, hangs on the bushes till fully ripe, does not turn red in the baskets, has an unusually long season.

Raspberries

To keep a raspberry bed in good productive condition, the old, weak and dead wood should be cut out every season, to give strength to the young shoots for the next year's bearing. In the spring the weakest suckers can be removed, leaving five or six of the strongest in each hill. To guard against injury by the Winter, the canes may be tied to stakes and covered with straw, or they may be layed down in the autumn and covered with a few inches of earth, leaves or bunches of evergreens.

Red Raspberries

Columbian—This is the greatest raspberry in existence. Plant, a giant in growth, very hardy; fruit large, dark red, rich, juicy and delicious flavor. Excels all others for canning. A splendid shipping variety and has been known to produce over 8,000 quarts to the acre.

Cuthbert—One of the most valuable of the older varieties; hardy, healthy and productive; good flavor and ships well.

Loudon—Large and beautiful. Ripens about with Cuthbert, continuing later, and in quality fully as good.

Black Raspberries (Black Caps)

Cumberland—The largest of all Black Caps; strong grower and produces immense crops. The most profitable market variety.

Gregg—Fruit large and of good quality; very productive and for many years the leading standard, best known market sort.

Kansas—Very large, firm and of excellent quality; very hardy and productive. One of the best Black Caps.

Yellow Raspberries

Golden Queen—Large, beautiful amber color; firm and of fine quality. Plant vigorous, hardy and remarkably productive.

Dewberries

Lucretia—One of the low-growing trailing blackberries; in size it equals any of the tall-growing sorts. Perfectly hardy, healthy and remarkably productive, with large, showy flowers. We can highly recommend this variety.

Price List of Fruit Trees and Small Fruits on Last Page

Strawberries

Strawberries will succeed in any soil that is adapted to ordinary farm or garden crops. Soil should be thoroughly prepared to a good depth, well drained and enriched. For field culture set in rows 3 to 3½ feet apart, fifteen to eighteen inches in rows for garden, 15 inches apart each way, leaving pathways every third row. In winter a covering of leaves, straw or some kind of litter will protect the plants. Do not cover the plants until ground is frozen, or so deep as to smother the plants, and remove before growth starts in spring.

Dip the plants in water as soon as received and bury the roots in moist, shady ground till you are ready to set them out. Those marked (P) have pistillate or imperfect flowers, and must be planted near perfect-flowering kinds, in order that flowers may be fertilized. The varieties not so marked are perfect flowering, and can be planted alone.

Brandywine (Perfect)—Season medium to late. One of the heaviest fruiters and a splendid shipper. Berries very large, deep red to center; stem short and stout, holds its great load of berries well up from the ground. One of the strongest pollinizers for pistillates.

Bubach (Imp.)—One of the best varieties we have. In productiveness unsurpassed. Noted for its uniform and large size. The plant is hardy and the leaves endure hot sun, as it is a very robust variety and does not rust. Mid-season.

Haverland—A great market berry; early and immensely productive. Berry large, somewhat long and pointed in shape; a standard sort for market.

Sample—Large size and fine quality, quite firm; continues a long time in fruit. The berries are large to the last. For the market men it is the best strawberry ever grown. It will yield as many berries as the Haverland, and will average as large as Bubach. Colors all over at once.

Gandy (Perfect)—This superb, late variety is second to none as a fine, handsome, beautiful, firm, fine-flavored, late berry. The fruit always brings the highest market price. This is one of the most profitable berries to grow for a fancy market or for home use, where quality is the first consideration.

We have also the following varieties:

Bederwood	New York	Stevens' Late (P.)
Bisel	Nick Ohmer	Warfield
Crescent (P.)	Repeater (P.)	Marshall
Glenmary	Senator Dunlap	Wm. Belt (P.)
Michael's Early	Sample (P.)	

Asparagus

To plant, see that the ground is well drained. Work it up fine and deep, make it very rich with well-rotted manure. Locate the plants eight inches apart in rows three feet apart, spread out the roots in a trench made deep enough to permit the crowns to be covered with three or four inches of mellow earth. Give the beds a dressing of manure, and except near the seashore three pounds of salt early every spring. Do not cut for use until the plants have grown two seasons.

Columbian Mammoth White—A very strong grower, producing very large, white shoots, that in favorable weather remain white until fit for use. Market gardeners and those growing for canners will find this a very profitable variety.

Palmetto—A very early variety; even, regular size and of excellent quality. It has been tested both north and south and has proven entirely satisfactory.

Rhubarb or Pie Plant

This affords the earliest material for pies and tarts: continues long in use and is valuable for canning. Make the border very rich and deep: needs high culture.

Early Scarlet—Rather small, but early and good.

Linnaeus—Large, early, tender and fine. The very best of all.

Queen—Strong, vigorous grower; producing extra large stock of the best quality.

Ornamental Department

Only too many city residences and farm homes are lacking in the element of beauty so readily supplied by choice flowering shrubs, vines and shade trees; they amply repay by their homelike beauty the small cost required to buy them, and the little attention necessary to grow them.

ALDER

European—A tree of rapid growth, suitable for damp soils, but thriving well everywhere. 75c each.

Imperial Cut-Leaved—A very striking and beautiful tree, with delicate and beautiful cut leaves; hardy and of vigorous growth; one of the finest cut-leaved trees in cultivation. 75c each.

Maple Norway—A large handsome tree, of spreading rounded form, with broad deep green shining foliage. 6 to 8 feet. 75c each.

Silver Maple—A hardy rapid growing tree of large size. Valuable for producing a quick shade. Excellent for street planting. 6 to 8 feet. 50c each.

American Elm—A noble native tree of large size, wide spreading head and gracefully drooping branches. One of the grandest park and street trees. 6 to 8 feet. 75c each.

Poplar, Carolina—A vigorous, healthy native tree of rapid growth, valuable for park or street planting. Makes a fine spreading head, if well cut back the first few seasons; succeeds everywhere. 50c each.

Catalpa, Speciosa—One of the most beautiful lawn or street trees, producing magnificent flowers early in spring; very rapid growing; beautiful. 50c each.

Horse Chestnut—The well-known species; has magnificent spikes of white flowers.

Horse Chestnut, Double White-flowering—Very fine and rare. 50c each.

Mountain Ash (European)—A fine hardy tree; head dense and regular, covered from July till winter with great clusters of bright red berries. 7 to 8 ft. 75c each.

European White Birch—The Birches are very ornamental and very hardy trees. Their slender, graceful habit and conspicuous white trunks make them attractive and popular features in a landscape. 75c each.

Dogwood, White-flowering—Flower three inches in diameter, produced in spring before the leaves appear; very showy. Spreading, irregular form, growing 20 to 25 feet high.

Dogwood, Red-flowering—The same as above, only a bright, fresh, cheerful red. 75c each.

Weeping Trees

Elm, Camperdown—This forms one of the most picturesque drooping trees. The foliage is very dense making a perfect arbor. 75c each.

HORSE CHESTNUT

Mountain Ash—A beautiful tree, with straggling, weeping branches; makes a fine tree for the lawn. 75c each.

Tea's Weeping Russian Mulberry—A weeping variety of the very best sort. It withstands extreme heat and cold; a strong grower and makes a very showy appearance. 75c each.

Kilmarnock Weeping Willow—Grafted on a straight stem at the height of 5 to 6 feet, this forms without any trimming an exceedingly graceful tree with glossy foliage and with perfect umbrella head; unique and beautiful in form; a vigorous luxuriant grower, thriving in all soils. Not hardy in Northern latitudes. 50c each.

Cut Leaf Weeping Birch—One of the most elegant of our weeping trees. Its tall, slender, yet vigorous growth, graceful drooping habit, silver white bark and delicate cut foliage presents a combination of attractive characteristics rarely met with in a single tree. 5 to 6 feet. 50c each.

Deciduous Shrubs

Althea (Rose of Sharon; &c.)—All the Altheas are fine flowering, easy and rapid growing shrubs, producing an abundance of flowers when scarcely any other tree or shrub is in bloom. Red, Purple, White. 35c each.

Barberry—Very showy in foliage. Flowering. 35c each.

DEUTZIA

Rough-Leaved (*Scabra*)—One of the most beautiful profuse flowering shrubs; white.

Slender Branched (*Gracilis*)—A charming

WISTERIA

SPIREA VAN HOUTTE

species, introduced from Japan by Dr. Siebold; flowers pure white; fine for pot culture, as it flowers freely at a low temperature in winter.

Crenata Flora Plena—Similar in growth and habit to the above; flowers double; white tinged with rose.

Pride of Rochester—Very large double white flowers. It excels in size of flower, profuse bloom and vigorous growth; nearly a week earlier than *Deutzia Crenata*. 35c cents.

White Fringe—A native shrub, producing pure white flowers like cut paper. Very popular and desirable. 35c each.

Currant, Flowering—A gay shrub in early spring. Crimson and yellow flowered. 35c each.

Hydrangea Paniculata Grandiflora—A fine shrub growing from 8 to 10 feet high; flowers produced in great pyramidal panicles a foot long, changing from a pale green to white and again to pink. In bloom, during August and September when very few shrubs are in flower. Perfectly hardy. 25c each.

Tree Hydrangea—Same as *Hydrangea P. G.* except in tree form. 50c each.

Japan Snowball—One of the most valuable of our hardy shrubs. It forms an erect, compact shrub, six to eight feet high; blooms in June and for a long time is a solid mass of white, the plants being completely covered from the ground to the top of the branches with large balls of flowers, white as snow. 50c each.

SPIREA

Anthony Waterer—A dwarf bush 15 to 18 inches high, covered from spring till late fall with heads of crimson flowers. Perfectly hardy.

Billardi—Bright with dense panicles of rich pink flowers in July and August.

Van Houtte—The grandest of all the *Spireas*; it is a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom. *Spireas*, 25c each.

PLUM

Prunus Pissardii—The wood and leaf are of a rich, peculiarly vivid dark purple, holding the color well through the entire season, and in this respect superior to *Purple-leaved Birch*, or any purple-leaved tree we have. It also produces a black fruit of ornamental appearance, early in the season. 40c each.

Purple Fringe or Smoke Tree—A large and very ornamental shrub, with curious hair-like flowers of a pinkish brown color. It blooms in July, oftentimes covering the entire shrub and remaining the entire summer. 40c each.

Lilacs

Charles X—A strong rapid grower, with large shiny leaves, and reddish purple flowers.

Double Lilac—A new and choice variety of the Lilac, producing long racemes of double purple flowers, lasting longer than the single sorts.

White Persian—A fine sort white flowers, delicately tinged with rose color.

Large Flowering White—A beautiful variety; has very large purple-white panicles of flowers. Considered the best. Lilacs, 50c each.

Hardy Climbing Vines

Ampelopsis Vetchii (Boston Ivy)—This is one of the finest climbers we have for covering walls as it clings to the smoothest surface, covering it smoothly with overlapping foliage, giving it the appearance of being shingled with green leaves. The color is a fresh deep green in summer, changing to the brightest shade of crimson and yellow in autumn. It is hardy and becomes more popular every year. Strong plants 25 cents each, 5 for \$1.00.

CLEMATIS

Of all the vines used either for shade or decoration, none can compare with the Clematis in its many and varied forms, many of the varieties have flowers 5 to 7 inches in diameter. They are grand for pillars and trellises, and for running over rock work, old trees and stumps. They delight in rich soil, and a sunny situation, and are perfectly hardy.

Jackmanni—The well known large flowering blue clematis. The beautiful flowers, when fully expanded, measure 4 to 6 inches in diameter, intense violet-purple with a rich, velvety appearance, distinctly veined. It blooms continually from July until cut off by frosts. The plant is hardy, of fairly quick growth, and an abundant and successful bloomer. Each 35c.

Henryi—This is the finest of all large flowering white clematis, and should find a place in every collection. It is not only a vigorous grower, but a remarkably free and continuous bloomer, beginning with the earliest and holding on with the latest. Flowers large, of a beautiful creamy white, with reddish-chocolate anthers. A very desirable variety. Each 35c.

Madame Edouard Andre—Has been called the crimson Jackmanni. The plant is a strong, vigorous grower, and very free in bloom. The lovely flowers are large and of distinct crimson-red color. Distinct from all other varieties. Each 35c.

Paniculata—The small flowering, sweet-scented Japan clematis. One of the most vigorous, beautiful and desirable of all climbers. It is a very rapid grower, and desirable wherever a strong and rapid-growing vine is needed, on walls, verandas, fences, etc. In late summer it produces dense sheets of

medium size, pure white flowers, of the most pleasing fragrance. This variety was introduced from Japan, and has become one of the most popular vines in America. Will grow in almost any soil, and is entirely free from blight and insects. Each 35c.

Hall's Japan Honeysuckle—Nearly an evergreen climber, retains its leaves until mid-winter. It flowers in abundance from July to

HYDRANGEA PANICULATA GRANDIFLORA

Peonies

A splendid class of shrubs, flowering in all shades, from red and lilac, to white, with blooms from four to eight inches in diameter. Many of them are very double, and have a very delicate and refreshing fragrance; they are easily cultivated and require but little protection. White, red, crimson and pink. 35c each.

December and is the most fragrant of all varieties. Each 50c.

Bignonia or Trumpet Flower—An old favorite grown in most every garden. Flowers perfectly trumpet shaped, bright scarlet. A rapid grower; blooms almost continuously through the summer. Each 25c.

Wisteria, Chinese Purple—A most beautiful climber of rapid growth and producing long pendulous clusters of pale blue flowers. When well established makes an enormous growth; it is very hardy and one of the most superb vines ever introduced. Each 35c.

Virginia Creeper—Hardy and fine for covering walls and verandas. Each 25c.

Evergreens

These graceful, stately plants have always been favorites with us. They lend a touch of color to the landscape in winter time, and always please the eye with their handsome foliage.

ARBOR VITAE. (American). One of the finest evergreens for single planting or hedges, 35c each.

Globe—Dense and dwarf, forming a round ball without any training. 50c.

Siberian—Similar to American, but retains its green color better. 50c.

Hovey's Golden—Dwarf, dense, little evergreen with golden tinted foliage. 50c.

Pyramidal—Very dense and pyramidal tree, the narrowest and most columnar of the arbor vitae. 50c.

Japanese Arbor Vitae—A dwarf, compact form with bright green foliage. 75c.

Japanese Golden Arbor Vitae—A dwarf, dense growing shrub with golden yellow foliage. 75c.

BALSAM FIR—A very erect, regular, pyramidal tree, with dark green sombre foliage. Grows rapidly and is very hardy. 50c.

PINE, White—Foliage white silvery green. Well known tree. 50c.

Scotch—Robust spreading tree with stout, erect shoots. 50c.

Umbrella Pine—A quite hardy, odd, Japanese tree of pyramidal character, grows slowly to large size. Each branch and shoot terminated by a whorl of umbrella-like tufts or needles.

SPRUCE, Norway—A medium sized tree of pyramidal form. 35c.

Colorado Blue—This magnificent tree is a native of the Rocky Mountains, and very hardy. It is of fine compact habit and of very symmetrical growth. The rich blue of its foliage makes a marked contrast to the green of other trees. \$2.00 each.

Koster's Blue—Unquestionably the most beautiful of the spruces for garden or lawn. It is grafted from the bluest strain that can be found, the famous Koster variety. \$2.00.

HEMLOCK—A graceful and beautiful tree, with drooping branches, and delicate dark foliage. 50c.

AMERICAN ARBOR VITAE for hedging, \$15.00 per 100.

Hedge Plants

To secure a good hedge it is necessary to plant well. Dig a wide, deep trench, and work the soil thoroughly into the roots. Settle the ground firmly, so that each plant will be set as solidly as a post, then mulch heavily with some coarse material for a distance of one or two feet on either side, according to the size of the plants. This is especially necessary with Evergreens, and all exposure of the roots to

the sun and air must be strictly avoided. Evergreens should not be planted in the Fall.

DECIDUOUS HEDGE PLANTS

Honey Locust—Very hardy, and the cheapest and best for defensive hedges. \$4.00 per 100.

Osage Orange—Highly esteemed at the West and South. Not hardy enough for the Northern States. \$3.00 per 100.

Japan Quince—Unquestionably the finest of all plants for an ornamental hedge. Grows very compactly, will submit to any amount of pruning while the brilliant and showy scarlet flowers make it exceedingly attractive. \$20.00 per 100.

Barberry Thunbergii—A comparatively new shrub of low growing habit, seldom over four feet, unrivaled for beauty. Foliage a bright green until autumn, when it changes to brilliant tints of crimson and yellow. The conspicuous crimson berries remain on throughout the winter giving a very pleasing effect. \$2.50 per 10.

Privet, California—A species of unusual beauty that has become the most popular of all hedge plants. For groups and specimens it is equally pretty, and its shining leaves give it value for porch and terrace decoration, when grown in standard form. Can be sheared to any desired shape. 18 to 24 in., \$5 per 100. 2 to 3 feet, \$12.

The following are also very desirable for ornamental hedging, which will be found under the proper headings in this catalogue: Roses, Spireas, Altheas, Evergreens.

Roses

There is perhaps no plant or flower so generally cultivated today as the rose. For extensive grounds, for small lawns, for porch or trellis, for borders and hedges, for greenhouse or pot culture, roses are used with charming effect, and our wide assortment affords unlimited range in selection of varieties of exquisite beauty and fragrance for all purposes. In preparation of this catalogue, we have attempted to classify and describe only such varieties as are properly suited to general culture and may be grown successfully under ordinary methods of cultivation by the amateur.

CULTIVATION—Rich soil and good cultivation are necessary to produce satisfactory results. In planting, use plenty of old composted stable manure. This should be worked into and thoroughly mixed with the soil. It should not be thrown into the hole and allowed to come in direct contact with the roots. All roses should be severely cut back at the time of planting and thereafter every spring.

Our roses are strong plants, two years old, grown out of doors, well rooted and properly fitted for transplanting successfully. Most of them have bloomed before they are sent out.

OUR SELECT VARIETIES OF ROSES HYBRID PERPETUAL

Alfred Colomb—Extra large, round flower, very double and full; color bright carmine, crimson. One of the very best dark colored sorts. 25 cents each.

Frau Karl Druschki—A pure white, large sized and free-flowering. It is a remarkably handsome plant with bright, heavy foliage and strong, upright growth. The bloom is perfect in form on fine, long stems and of the purest possible white. There is nothing in the line of perfectly hardy roses that can compare with this one in form, color and general finish. 40 cents each.

Anna De Diesbach—Brilliant rose color, with long pointed buds and large perfectly formed blossoms; delightfully fragrant. A vigorous grower and persistent bloomer.

Coquette Des Alps—Large, full, finely formed flower; color white, sometimes faintly tinged with pale blush; profuse bloomer.

Gen. Jacqueminot—Too well known to require lengthy description. It still holds first place among the dark red roses and is one of the most satisfactory to grower. A rich crimson scarlet.

Marshall P. Wilder—Vigorous grower, with clean, healthy foliage, flowering profusely, and long after others are out of bloom. Color is a bright cherry carmine.

Soleil d' Or—Large, full and globular, fragrant buds conical shaped; color varying from gold and orange yellow to reddish-gold, shaped with nasturtium red.

Hugh Dickson—Intense crimson, shaded scarlet; very large, full and magnificent form, with high pointed center; growth upright and vigorous, free and continuous blooming; the finest of all Autumn roses, highly perfumed.

The above two varieties 40c ea., \$4.00 per doz.

HARDY CLIMBING ROSES

Crimson Rambler—This remarkable rose was originally received from Japan. The plant is of very vigorous growth, making shoots of from 8 to 10 feet high in a season, and therefore

TREE ROSE (For description see opposite page)

Clio—A grand addition to the white or blush hardy garden roses. Flower is simply perfect in form and magnificent in all its stages of growth. Plant strong and vigorous with large handsome foliage. Without question the finest white hybrid.

Paul Neyron—This is regarded as the largest rose in cultivation; is a free bloomer; hardy and very desirable in every way; color deep clear rose.

Margaret Dickson—Of magnificent form; white, with pale flesh center; petals very large, shell shaped and of great substance; fragrant, a fine variety; foliage very large, dark green.

All the above varieties 25c each, \$2.50 per doz.

a most desirable climbing variety. The flowers hold their beautiful crimson color a long time without fading, and give a most magnificent effect in contrast to the bright, glossy foliage. Is entirely hardy and the greatest acquisition among roses for the past ten years.

Baltimore Belle—White with blush center, very full and double; one of the finest climbing roses; a rapid grower, with hardy and luxuriant foliage and immense clusters of flowers.

Dorothy Perkins—Large for a rose of this class, very double, of a beautiful shell pink color, sweetly scented, and borne in clusters of thirty and forty. One of the best.

FRAU KARL DRUSCHKI (For description see page 29)

Queen of Prairie—Bright rose red, frequently with white striped foliage and quite deeply serrated.

Climbing Roses 25c each, \$2.50 per doz.

TEA OR EVER BLOOMING ROSES

Pearl Des Jardines—Probably better known than any other Rose grown. Beautiful clear yellow, distinct from all other Tea Roses.

Meteor—Rich velvet crimson, exceedingly bright and attractive. One of our best general utility Roses. The plant is of a vigorous growth, and very free flowering: a constant bloomer. Fine for summer bedding or in pots.

The Bride—A new and popular Rose for

greenhouse and window culture. Succeeds in summer grown out of doors.

Hermosa—Always in bloom and very fragrant, a most pleasing shade of pink. 93

Price of Tea Roses, 25c each, \$2.50 per doz.

TREE ROSES

The Tree Roses are grafted on hardy Rose stalks four or five feet high, are tree shaped, and when in full bloom are objects of beauty, making handsome plants for the lawn or rose border. In this shape we offer only the Hybrid Perpetuals or hardy class. We have them in white, the different shades of pink, red and crimson. Fine strong trees that will bloom nicely the first year. \$1.00 each, \$9.00 per doz.

PRICE LIST OF FRUIT TREES

Boxing and Baling Free at These Prices

APPLES—All budded on whole roots of imported French stock. Free from Aphis and crown gall. We have some extra fine blocks of apples to offer this year.

What Some of Our Customers Say

Butler, N. J., May 18, 1908.

Reilly Bros., Dansville, N. Y.

Dear Sirs: The trees arrived on Friday night and were in good shape. I thought they would be dried up pretty well by being on the road so long but were all right. If I send again I will have them shipped to Bornton; the D. L. & W. runs through there.

Yours truly,

Eugene Peer.

Livermore, May 10, 1909.

Reilly Bros., Dansville, N. Y.

Dear Sirs: I got my trees May 3, in fine shape. Everything is satisfactory about the trees. I thank you for the extras you sent me. Some of the family thought the trees would not get here in time to grow, but they did. Some of them were very near in leaf in the box. They are making leaves and large buds fast. I have five more acres to plant in trees. Let me hear from you about fall planting—when it is done and if it is as good as spring planting.

Yours truly,

Lowry Lewis.

Saco, Me., May 22, 1909.

Reilly Bros., Dansville, N. Y.

Dear Sirs: Received the trees all right some time ago and have set them all out, and think that the most of them are started nicely. I thank you very much for the extra trees you sent and shall certainly recommend your firm very highly. Shall expect to buy trees of you in the future myself.

Yours truly,

Albert S. Boothby.

Ellwood City, Pa., May 17, 1909.

Reilly Bros., Dansville, N. Y.

Dear Sirs: I received my plant order in very good condition, especially the peach trees were fine. I would have liked very much to send for current bushes but will have to leave them until fall.

Yours respectfully,

Mrs. M. J. Pizor

Shrewsbury, Pa., Apr. 30 1909.

Reilly Bros., Dansville, N.Y.

Gentlemen: I received the shipment of trees and am pleased to say they were all fine trees, better in fact than I expected.

I wish to thank you for sending such nice stock and hope to give you another order this Fall.

Very truly,

H. W. Rehmeier.

Cumberland Center, Maine, May 3, 1908.

Reilly Bros., Dansville, N. Y.

Dear Sirs: I received your trees Monday. They are all right. I am much obliged for extra tree you put in. I am going to try and get you some orders another year. I have been very busy and have been away so I could not tend to it before. I hauled my last load of apples the day before yesterday. I got a dollar and a half a bushel.

George D. Porter.

Any portion of 100 lbs. at above express rates, but no package forwarded for less than 35c. We rarely ship trees baled by freight, as the rate is much higher than in boxes.

ESTIMATED WEIGHT OF TREES AND PLANTS BOXED.

Trees, large size,	6 to 7 feet,	200 to 250 lbs. per 100 trees.
Trees, medium size.	5 to 6 feet,	150 to 200 lbs. per 100 trees.
Trees, small size,	4 to 5 feet,	100 to 150 lbs. per 100 trees.
Shrubs, Roses, etc.,	No. 1 size,	75 to 100 lbs. per 100 plants.
Grapes, Berries, etc.,	No. 1 size,	25 to 50 lbs. per 100 plants.

It is impossible to give a more definite estimate as some varieties weigh more than others, on account of the difference in the density of the wood growth. For instance, a Peach tree would weigh less than a Pear tree of exactly the same size. The above however will enable you to make a close estimate as to the freight rate on a given amount of stock.

The Railroads bill all small shipments as weighing 100 lbs. each, even though the actual weight be less.
